CONTENTS

PREFACE xxv

ACKNOWLEDGEMENTS xxvii

In Memoriam PIERRE GRABAR xxix

THE FIFTEENTH ARNE TISELIUS MEMORIAL LECTURE

From Moving Boundary Electrophoresis to Immobilized pH Gradients 3
PIER GIORGIO RIGHETTI, ELISABETTA GIANAZZA, CECILIA GELFI and PRANAV K. SINHA

SECTION A. SYNTHETIC PEPTIDES

A.1. Peptide Synthesis

Advances in Fully Automated Peptide Synthesis 15
A. D. AUFFRET, W. HIRST, L. G. MEADE and M. W. THACKER

Facile Determination of Exact Amino Acid Involvement in Peptide Antigen/Monoclonal Antibody Interactions 19
R. A. HOUGHTEN

Convergent Solid Phase Peptide Synthesis: Recent Progresses 23
J. Van RIETSCHOTEN, J-M. SABATIER, M. TESSIER, C. GRANIER, E. PEDROSO, A. GRANDAS, F. ALBERICIO, R. ERITJA, E. NICOLAS, J. JOSA and E. GIRALT

Enzymatic Peptide Synthesis: Current Possibilities and Future Prospects 27
F. WIDMER, S. BAYNE, G. HOUEN, P. THORBEK and J. T. JOHANSEN

Use of Acetylthioglycolic Acid for the Thiolation of Peptides During Solid Phase Synthesis 31
R. PRESENTINI, L. LOZZI, F. PERIN, M. MARIANI, M. C. CASAGLI, P. NERI and G. ANTONI

Press-Stud Protein Conjugates 35
R. E. OFFORD and K. ROSE

Enhancement by *N*-Hydroxysulfosuccinimide of Water-Soluble Carbodiimide-Mediated Couplings of Peptides to Protein Carriers 39
JAMES V. STAROS, DEBORAH M. SWINGLE, RICK W. WRIGHT and P. S. R. ANJANEYULU

Novel Maleimido-biotins for the Selective Biotinylation of Sulfhydrils 43
H.-J. FRIESEN, P. HERMENTIN and P. GRONSKI

Colorimetric Quantitation of Synthetic Peptide Conjugation Using Ellman's Reagent 47
FRANK A. ROBEY

The Concept of Conformational Restriction in Peptide Analog Design 51
PETER W. SCHILLER, THI M.-D. NGUYEN, CAROLE LEMIEUX and LOUISE A. MAZIAK

Synthesis of Atrial Natriuretic Factor and Highly Active Analogs 55
R. F. NUTT, S. F. BRADY, T. A. LYLE, T. M. CICCARONE, W. J. PALEVEDA, C. DYLION COLTON, D. F. VEBER and R. J. WINQUIST

A.2. Hydrophilicity Related Problems

Protein Interaction Sites Predictable by Hydrophilicity Analysis 59
T. P. HOPP

A.3. Structural Aspects

Structure–Function Studies of Synthetic Peptide Analogs of the Amphipathic Helix 63
G. M. ANANTHARAMAIAH, A. GAWISH, M. IQBAL, S. A. KHAN, C. G. BROUILLETTE and J. P. SEGREST

Probing Protein Secondary Structures Using Antipeptide Antibodies 67
HEINRICH PRINZ, URSULA SCHULZE-GAHMEN and KONRAD BEYREUTHER

Structure of Human Insulin Receptor 73
J. RAMACHANDRAN and C. GRUNFELD

Prolactin Release Inhibiting Factor 77
J. RAMACHANDRAN, K. NIKOLICS, A. MASON, E. SZONYI and P. SEEBURG

A.4. Immunological Topics

A.4.1. Antigenicity

Definition of Antigenicity in Proteins and Peptides 81
M. H. V. VAN REGENMORTEL

Immunochemical Reactivity of Synthetic Peptides 87
S. MULLER, J. P. BRIAND, S. PLAUE and M. H. V. VAN REGENMORTEL

Probing the Antigen Combining Sites of Antibodies Using Synthetic Peptides 91
S. J. RODDA, H. M. GEYSEN, T. J. MASON and G. TRIBBICK

Simultaneous Multiple Peptide Synthesis: The Rapid Preparation of Large Numbers of Discrete Peptides 95
RICHARD A. HOUGHTEN

An Analysis of Synthetic Oligopeptides used as Immunogens 99
ANNE J. SOUTAR and JOHN W. PALFREYMAN

The Use of Peptides to Locate Epitopes on the Surface of Foot-and-Mouth Disease Virus 103
R. H. MELOEN, W. C. PUYK, D. J. A. MEIJER, H. LANKHOF, W. P. A. POSTHUMUS, and W. M. M. SCHAAPER

A.4.2. Virus recognition and vaccines

Synthetic Peptides Identify Native Antigenic Determinants Associated with Human T-Lymphotropic Virus Type III 107
R. C. KENNEDY, T. C. CHANH, P. KANDA, J. W. EICHBERG, J. S. ALLAN, T. H. LEE, M. ESSEX and G. R. DREESMAN

Development of an Antifertility Vaccine Using Synthetic Peptide Antigens 111
P. D. GRIFFIN

Identification of Herpes Simplex Virus Gene Products Using Anti-Peptide Sera 115
M. C. FRAME, D. J. McGEOCH, J. W. PALFREYMAN, C. A. MacLEAN and H. S. MARSDEN

Immunogenicity and Hapten-Like Features of Synthetic Peptides of Herpes Simplex Virus Type 1 Glycoprotein D 121
H. J. GEERLIGS, W. J. WEIJER, G. W. WELLING, W. BLOEMHOFF and S. WELLING-WESTER

Immunization Studies Using Resin-Bound Synthetic Peptides 125
P. KANDA, R. C. KENNEDY and J. T. SPARROW

Synthetic Peptides as Reagents for Detection of Pre-S Specific Hepatitis B (HB) Antigens and Antibodies 129
A. R. NEURATH, S. B. H. KENT, N. STRICK, W. OFFENSPERGER, S. WAHL, J. K. CHRISTMAN and G. ACS

Progress Towards a Synthetic Hepatitis B Vaccine 133
C. R. HOWARD, J. ALLAN, S-H. CHEN, S. E. BROWN and M. W. STEWARD

Humoral and Cellular Responses in Man Following Immunisation with Hepatitis B Vaccine: Analysis with Synthetic Peptides 137
M. W. STEWARD, B. M. SISLEY, C. STANLEY, S. E. BROWN and C. R. HOWARD

Pre-S Gene-Encoded Domains of the Hepatitis B Virus (HBV) Envelope (ENV) Protein are Essential for Future Vaccines 141
A. R. NEURATH, S. B. H. KENT, N. STRICK and K. PARKER

A.4.3. T cells

Use of Natural and Synthetic Peptides to Determine the Fine Specificity of Cytochrome *c* Specific T Cell Clones 145
G. CORRADIN, C. J. A. WALLACE, A. E. I. PROUDFOOT, A. S. VERDINI and S. BAUMHÜTER

Peptides and Cytotoxic T-Cell Recognition of Protein Antigens 149
J. B. ROTHBARD, A. R. M. TOWNSEND and A. J. McMICHAEL

Synthetic Antigens in the Analysis of Regulatory T Cells and T–B Cell Collaborations 153
E. MOZES, H. ZINGER and O. AXELROD

Synthetic Localization of T- and B-Cell Recognition Sites of Influenza A Virus Hemagglutinin and the Antibody and T-Cell Responses to the Sites 157
M. ZOUHAIR ATASSI and JUN-ICHI KURISAKI

Helper and Suppressor T Cell-Inducing Determinants of Lysozyme N-Terminal Synthetic Peptides 161
L. ADORINI, A. SETTE, E. APPELLA and G. DORIA

Localization of the Continuous Sites Stimulating T-Cell Proliferation and the Definition of an Immunodominant Region in Myoglobin 165
G. S. BIXLER, JR. and M. Z. ATASSI

A.4.4. Various topics

Use of Synthetic Peptides Representative of Fc Sequences in the Delineation of IgG and IgE Effector Functions 169
D. R. STANWORTH

Solid Phase Peptide Synthesis (SPPS) of Allergenic Epitopes. Perspective Applications in the Diagnosis and Management of Allergic Diseases 173
SAID ELSAYED

Effect of the Synthetic Oestrogen Diethylstilboestrol and the LHRH Analogue Leuprolide on Immunological Responsiveness 177
R. J. ABLIN, J. M. BARTKUS, A. REDA, J. A. SCORZA and M. J. GONDER

Substance P Converting Endopeptidase in Human Cerebrospinal Fluid 181
FRED NYBERG, CHRISTER SUNDQVIST and PIERRE LE GRÉVES

Characterization of Anti-Native Protein MAbs Evoked by a Free and Carrier-Conjugated Synthetic Peptide 185
M. MARIANI, L. BRACCI, R. PRESENTINI, D. NUCCI, P. NERI and G. ANTONI

Mucosal and Systemic Antibodies Against Cholera Toxin Induced by Peyer's Patch Immunizations with a Synthetic Peptide Conjugated to Tetanus Toxoid 189
J. P. VAERMAN, R. ARNON and C. O. JACOB

Cross-Reactivity of Synthetic Peptide Antibodies: A Clue for the Pathogenesis of Alzheimer's Disease 193
L. K. DUFFY, J. KATES, M. B. PODLISNY, R. WALSH, L. GALIBERT and D. J. SELKOE

Synthetic Peptides for Production of Domain Specific Antibodies 197
C. KUYAS, A. HAEBERLI and P. W. STRAUB

Diverse Effects of Synthetic Peptides Similar to Parts of Core Protein on Synthesis of Proteoglycans, Total Protein and Ribonucleic Acids (RNAs) in a Calf Rib Cartilage System 201
T. O. KLEINE, E. VESTWEBER, W. WIECZOREK, R. QUIRIN and R. GERLACH

Inhibition of Phagocyte Functions by a Synthetic Peptide Lys-Pro-Pro-Arg (Postin) 205
J. LEUNG-TACK, J. MARTINEZ, J. L. SANSOT, Y. MANUEL and A. COLLE

Specific and Non-Specific Growth-Hormone (GH) Response to Hypophysiotropic Neuropeptides in Type I Diabetes Mellitus: The Role of The Metabolic Control 209
O. GIAMPIETRO, M. FERDEGHINI, R. MICCOLI, M. CERRI, M. C. ORLANDI, G. PENNO, A. MASONI, E. E. MÜLLER and R. NAVALESI

Discrimination of Monomeric and Tetrameric SV40 Large T-Antigen by Antipeptide Sera 213
U. FRIEDRICH

Tissue and Species Distribution of Receptor Subtypes for Atrial Natriuretic Factor 217
M. A. NAPIER, M. T. LIPARI and R. L. VANDLEN

SECTION B. ACUTE PHASE RESPONSE

B.1. Regulatory Factors

Conserved Sequences in the 5′ Regions of the Human Transferrin (*TF*) and Haptoglobin (*HP*) Genes that May Relate to the Acute Phase Reaction 223
BARBARA H. BOWMAN, GWENDOLYN S. ADRIAN, JEAN B. LUM, KATHLEEN H. NABERHAUS and FUNMEI YANG

Influence of Synthesis of Plasma Proteins — in Particular Acute Phase Proteins — by Hepatocytes on the Production of Other Hepatic Proteins 227
G. FELDMANN

Influence of Hepatocyte-Stimulating Factor on the Expression of Major Acute Phase Plasma Protein Genes 231
H. BAUMANN, M. D. GLIBETIC, V. A. ONORATO and G. P. JAHREIS

Interleukin-1 and Cachectin/Tumor Necrosis Factor Regulate Hepatic Acute Phase Genes 235
DAVID H. PERLMUTTER, CHARLES A. DINARELLO, PATRICIA I. PUNSAL and HARVEY R. COLTEN

Mouse Acute-Phase Proteins: Induction by Recombinant Human Interleukin 1 239
PETER M. H. HEEGAARD and KLAUS BENDTZEN

Localisation of Binding Site(s) on IGE for Specific Receptor on Mast Cells 243
D. S. BURT, G. Z. HASTINGS and D. R. STANWORTH

Growth Factors as Mediators of Extracellular Matrix Synthesis and Degradation in Man 247
C. W. CASTOR, A. R. CABRAL, C. G. RAGSDALE, D. A. WALZ and P. A. HOSSLER

Regulation of C-Reactive Protein Secretion by Cultured Rabbit Hepatocytes 251
S. MACINTYRE, D. SAMOLS and K. KUSHNER

Structure and Regulation of Rat Alpha2-Macroglobulin in Acute Inflammations 255
G. H. FEY, M. R. GEHRING, B. R. SHIELS, M. H. L. DE BRUIJN, A. C. CHAIN, C. C. KAN, D. J. NOONAN, H. UEBERBERG and W. NORTHEMANN

B.2. A.P.P.

B.2.1. C.R.P.

How C-Reactive Protein has Evolved 259
I. KUSHNER

The Rabbit C-Reactive Protein Gene — Its Structure and Expression in Bacteria 263
DAVID SAMOLS and SHOU-IH HU

C-Reactive Protein, Chromatin, Immunomodulation and the Acute Phase Response. *In Vitro* Evidence for a Possible "CRP Cycle" 267
F. A. ROBEY and K. D. JONES

A Study of the Binding of Human CRP for Phosphocholine 271
M. OLLIVIER, M. PONTET and R. ENGLER

Arguments for the Presence of a Ligand of Human CRP in Serum 275
M. PONTET, J. P. TRESCA, M. OLLIVIER and R. ENGLER

C-Reactive Protein Contains Tuftsin-Related Sequences 279
RICHARD BUCHTA, MATI FRIDKIN, MICHEL PONTET and DOMINICO ROMEO

Monoclonal Antibodies to Human C-Reactive Protein (CRP) and Some Characterization of a Rat Serum Protein Related to CRP 283
H. HIRAI, W. NUNOMURA and M. HATAKEYAMA

Stimulatory Effects of the C-Reactive Protein Subunit on Monocyte Function, Including Release of II–1 287
L. A. POTEMPA, H. GEWURZ, J. E. HARRIS and D. P. BRAUN

Effects of Pentamer, Peptide and Aggregate Forms of Rabbit C-Reactive Protein on PMNL Activation 291
T. J. DOUGHERTY, J. M. ZELLER, L. A. POTEMPA, H. GEWURZ and JOAN SIEGEL

Detection of C-Reactive Protein Binding Sites on Human Monocytes 295
J. M. ZELLER, K. K. JAMES, A. L. LANDAY, T. F. LINT and J. GEWURZ

Inhibition of Platelet Activation by Peptides Derived From C-Reactive Protein (CRP) 299
B. A. FIEDEL

Singular Characteristics of Hamster Female Protein 303
JOHN E. COE

Interaction Between Phosphorylcholine Binding Proteins and Serum Lipoproteins 307
S. MOOKERJEA, U. SAXENA and A. NAGPURKAR

C-Reactive Protein in Distinguishing Between Subendocardial and Transmural Myocardial Infarct 311
A. HARMOINEN, K. PIETILÄ and L. PÖYHÖNEN

CRP Measurements in Rheumatic Disorders 315
M. A. VAN LEEUWEN, M. H. VAN RIJSWIJK, J. MARRINK, J. WESTRA and H. J. DE JONG

C-Reactive Protein and Effect of Tocolysis in "Uncomplicated" Preterm Labour 319
A. H. M. SIMONS, K. DEGGELLER, J. MARRINK and H. J. HUISJES

X-Ray and Neutron Scattering Studies on CRP and SAP 323
STEPHEN J. PERKINS and MARK B. PEPYS

B.2.2. S.A.A.

Structural Analysis of Human Serum Amyloid A Genes 327
GEORGE H. SACK, JR., JOHN J. LEASE and CANDY S. DeBERRY

Analysis of SAA Gene Expression in Rat and Mouse During Acute Inflammation and Accelerated Amyloidogenesis 331
J. SIPE, H. ROKITA, T. SHIRAHAMA, A. COHEN and A. KOJ

ApoSAA: Molecular Biology and Physiology: Differential Expression of Three Mouse SAA Genes 335
E. P. BENDITT, R. L. MEEK and N. ERIKSEN

Changes in the Serum Amyloid A Protein Complex During the Acute Phase Response 339
J. C. RENVERSEZ, S. ROUSSEL, M. J. VALLE

Serum Amyloid A Protein as an Inflammation Marker: Clinical Aspects 343
C. P. J. MAURY

SAA Versus CRP in Chronic Inflammatory Diseases 347
S. JANSSEN, P. C. LIMBURG, J. BIJZET, H. J. de JONG, J. MARRINK, M. A. VAN LEEUWEN, M. H. VAN RIJSWIJK

Use of Serum Amyloid A (SAA) Protein Measurements in Assessing Inflammatory Disease 351
R. E. CHAMBERS and J. T. WHICHER

Immunological Analysis of Amyloid Protein A with Monoclonal Antibodies 355
A. YACHI, T. YAMASHITA, Y. HINODA and K. IMAI

Characteristics of apo-SAA-Containing HDL_3 in Humans 359
A. F. STRACHAN, F. C. DE BEER, G. A. COETZEE, H. C. HOPPE, M. S. JEENAH and D. R. VAN DER WESTHUYZEN

Modelling apo-SAA/Phospholipid Interactions 363
WILLIAM TURNELL, ROBERT SARRA, JEREMY O. BAUM and MARK B. PEPYS

Both SAA and AA are Associated with HDL in Human Serum 367
A. HUSEBEKK, B. SKOGEN and G. HUSBY

Preliminary Cystallographic Studies of Serum Amyloid P Component (SAP) 371
G. OLIVA, B. P. O'HARA, S. WOOD, M. B. PEPYS and T. BLUNDELL

Clinical Acute Phase Pattern of Serum Amyloid A 375
G. MARHAUG, M. ØSTENSEN, G. HUSBY, S. KOLMANNSKOG, T. FLAEGSTAD, T. STOKLAND and A. HUSEBEKK

Molecular Cloning of Genes Encoding Isotypes of Murine Serum Amyloid A Protein 379
K. YAMAMOTO, M. SHIROO and S. MIGITA

Synthesis and Secretion of Serum Amyloid A (SAA) and of a SAA-Related Protein by Hepatocytes, Kupffer Cells and Peritoneal Macrophages of the Mouse 383
G. RAMADORI, H. RIEDER, A. MITSCH, J. SIPE, K.-H. MEYER ZUM BÜSCHENFELDE

Two Different Sets of Charge Variants of Amyloid Fibril Protein AA Recognized by Monoclonal Antibodies 387
R. P. LINKE

Binding of Serum Amyloid P-Component (SAP) to Soluble *Saccharomyces Cerevisiae* Zymosan Extract, and Yeast Mannans and Phosphomannans 391
B. M. KUBAK, L. A. POTEMPA, A. GEWURZ, M. E. SLODKI, M. VENEGAS, B. ANDERSON and H. GEWURZ

Elastase Inhibition by the Amyloid P-Component 395
G. VACHINO, L. W. HECK, M. M. KAPLAN, J. A. GELFAND, J. F. BURKE and K. P. W. J. McADAM

B.2.3. Fibronectin

Fibronectin in Myeloproliferative Disorders 399
L. JAKAB, K. CSEH, L. KALABAY, J. TÖRÖK, J. MARTICSEK and Sz. BENEDEK

The Acute Phase Response of Fibronectin in Rat Hepatocytes: Modulation of the Synthesis Rate by Inflammation and Traumatic Injuries 403
K. H. PICK-KOBER and A. M. GRESSNER

B.2.4. Alpha-1-antitrypsin

α-1-Antitrypsin and α-1-Acid Glycoprotein in Relation with Albumin and Prealbumin in Cerebrospinal Fluid (CSF) and Blood Serum of Patients with Neurological Diseases 407
T. O. KLEINE

Secretion of Normal and Abnormal α_1-Antitrypsin from Xenopus Oocytes 411
D. M. ERRINGTON, I. C. BATHURST and R. W. CARRELL

Acute Phase Reaction in Malignant Mammary Tumors. Diagnostic Value of Alpha 1-Antitrypsin 415
P. LISO-IRURZUN, B. URIARTE, J. A. AMIGUET, M. MUÑOZ, J. JIMENEZ, J. M. URIARTE and J. PRIETO

Immunological Assessment by Electroimmunoassay of α_1-Antichymotrypsin in Presence of Serine Proteases 419
A. LAINE, M. DAVRIL, M. RABAUD, D. MARKO, J. CARRERE and A. HAYEM

The Functional Heterogeneity of α_1-Proteinase Inhibitor 423
A. HERCZ

Variations of Major Acute Phase Alpha-1-Protein Response in Normal, Non-Malignant and Malignant States 427
J. MILLÁN, A. LORENZO, P. RODRIGUEZ, P. GALLURT, J. ROMEO and A. SENRA

B.2.5. Various A.P.P.

Limited Tryptic Cleavage of Rat Hemopexin and Purification of the Domain Fragments 431
MARK E. HEINY, NOBUHIRO TAKAHASHI, SEIICHI NODA and FRANK W. PUTNAM

Cell- and Stage-Specific Expression of Cloned Human Haptoglobin 437
GIOVANNI RAUGEI, GUILIANO BENSI, SALVATORE OLIVIERO, PAOLO MONACI and RICCARDO CORTESE

Caeruloplasmin: Acute Phase Reactant or Scavenger of Oxygen Free Radicals? 441
A. AGOSTONI, G. C. GERLI, R. MONGIAT, M. T. SANDRI, D. ALMINI and L. BERGAMASCHINI

Ferritin in Monoclonal Gammopathy 445
J. MARRINK, O. A. VAN DOBBENBURGH and H. PIERSMA

The Microheterogeneity of the Acute Phase Reactant Alpha-1-Antichymotrypsin in Testicular and Colorectal Cancer 449
A.-M. DAMGAARD, P. M. H. HEEGAARD, J.-E. S. HANSEN and T. C. BØG-HANSEN

Molecular Cloning of the Complement Serine Proteases C1r and C1s and of Their Inhibitor C1-Esterase Inhibitor 453
M. TOSI, A. JOURNET, D. LYONNET, M. COLOMB and T. MEO

Lymphokine-Mediated Modulation of Complement Proteins C1r and C1s Biosynthesis by Human Monocytes 457
C. DROUET, A. JOURNET, A. REBOUL and M. COLOMB

Isolation and Characterization of P-57, A Serine Proteinase Specific to Human C3b, From Human Erthrocyte Membranes 461
CHRISTIANE CHARRIAUT-MARLANGUE, LAURE KRIKORIAN, MONIQUE BAREL and RAYMOND FRADE

Partial Cleavage of C9 Bound to Complement Lysed Erythrocyte Ghosts 465
E. W. RAUTERBERG and B. SCHMITT

Biosynthesis of Factor H by Rat Hepatocytes and Changes in Serum Concentration After Turpentine-Oil Induced Inflammation 469
M. DAVEAU, J. P. LEBRETON, M. HIRON and M. FONTAINE

Bradykinin Competetive Antagonists: Design and Applications 473
J. M. STEWARD and R. J. VAVREK

Relationship Between the Kininogenic Function of Rat T Kininogen and its Cysteine Proteinase Inhibiting Properties 477
F. ESNARD, T. MOREAU, N. GUTMAN, S. AKPONA, A. EL MOUJAHED and F. GAUTHIER

The Plasma Hormone Binding Proteins as Markers of Inflammation with Particular Reference to Transcortin (CBG), Alpha-Fetoprotein (AFP) and Thyroxin Binding Prealbumin (TBPA) 481
L. SAVU, R. VRANCKX, A. COHEN, H. ZOUAGHI and E. A. NUNEZ

A Macroglobulin from Cord-Blood with Platelet-Aggregation Inhibiting Properties 487
W. BOERS, N. C. J. J. LADIGES, C. LINTHORST, M. SALA, D. VAN TIEL, H. VAN VUGT and J. VAN GOOL

A New Case of Congenital Analbuminemia 493
N. VIOLANTE, A. PAESETTO and V. LISI

B.3. The A.P. Response in Models

In Vivo Induction of an Acute-Phase Response in Mice by Human Recombinant Interleukin-1 497
C. RORDORF-ADAM, D. SERBAN and C. DINARELLO

Isolation of a Lipopolysaccharide Binding Acute Phase Reactant from Rabbit Serum 501
PETER S. TOBIAS, KATRIN SOLDAU and RICHARD J. ULEVITCH

Enkephalin Degrading Activity in Rat Brain and Small Intestine 505
KONSTANTIN N. YARIGIN, INGRID ERIKSSON and FRED NYBERG

The Acute Phase Response in the Cow and Dog 509
J. G. CONNER, P. D. ECKERSALL and A. WISEMAN

The Effect of Chronic Inflammation of the Expression of Murine Acute Phase Plasma Proteins 513
M. D. GLIBETIC and H. BAUMANN

Mechanisms in Angiogenesis Action of a Monocytic Blood Vessel Morphogen (Angiotropin): *In Vitro* Studies on Motility, Differentiation and Spatial Organization of Cloned Capillary Endothelial Cells 517
M. HÖCKEL, J. SASSE and J. H. WISSLER

Structure and Function of a Monocytic Blood Vessel Morphogen (Angiotropin) for Angiogenesis *In Vivo* and *In Vitro:* A Copper-Containing Metallo-Polyribonucleo-Polypeptide as a Novel and Unique Type of Monokine 525
J. H. WISSLER, E. LOGEMANN, H. E. MEYER, B. KRÜTZFELDT, M. HÖCKEL and L. M. G. HEILMEYER, JR.

Enhanced Uptake of Amino Acids by Rat Hepatocytes Cultured in the Presence of Macrophage Cytokines 537
A. KOJ, H. ROKITA, D. MAGIELSKA-ZERO, A. KURDOWSKA, J. BERETA and J. GAULDIE

The Comparative Effects of Carrageenin and Adjuvant Inflammation in Inducing the Acute Phase Response in the Rat 541
E. J. LEWIS, JILL BISHOP and C. H. CASHIN

Charge Heterogeneity of Murine IgG-BF 545
U. BLANK, W. H. FRIDMAN, M. DAËRON, A. GALINHA, J. MONCUIT and C. NEAUPORT-SAUTES

Proteoheparan Sulfate in Rat Hepatocytes: Stimulation of its Synthesis in Acute Phase Reactions and During Endotoxinemia 549
A. DJOVKAR and A. M. GRESSNER

Epithelial Growth Inhibitors in Rat Serum and Human Platelets 553
K. MIYAZAKI, K. MASHIMA, T. KIMURA, W. HUANG, H. MASAKI, J. YAMASHITA and T. HORIO

Changes of Blood CK and LDH Isoenzyme Between Acute Hypoxic Stage and Its Recovery Stage in Rats 557
T. HAYASHI, K. TANAKA and S. NANBARA

B.4. The A.P. Response in Various Syndromes

Burn Patients as Typical Model of Acute Phase Response I: Usefulness of Acute Phase Proteins Changes in the Blood to Detect and Monitor Sepsis 561
P. LAURENT, J. MARICHY, G. BUFFET, P. GROS and B. BEAL

Burn Patient as Typical Model of Acute Phase Response II: Acute Phase Proteins and Their Related Immunomodulating Activities 567
P. LAURENT, P. GROS, B. NEAL, A. GASPARD and J. MARICHY

Acute Phase Proteins in the Neonate: Normal Values and Clinical Interest in Disease 573
J. BIENVENU, F. BIENVENU and L. SANN

Acute Phase Response in Human Liver Transplantation 581
A. BAUMGARTEN

Long Term Secretion of Acute Phase Proteins by Hepatocytes Co-Cultured with Another Liver Cell Type 585
F. DELERS, J. P. LEBRETON and A. GUILLOUZO

Acute Phase Proteins (APP) in Acute and Chronic Liver Disease 589
R. MELICONI, O. PARRACINO, M. L. SCHIATTONE, F. CHIODO, A. FACCHINI, F. MIGLIO and G. GASBARRINI

Acute Phase Proteins (APP) in Primary Liver Cell Cancer (PLCC) 593
R. MELICONI, O. PARRACINO, A. FACCHINI, R. GALLO, F. PANNUTI, F. TREMOLADA, F. MIGLIO and G. GASBARRINI

Serum Laminin Concentrations in Fibrotic and Cirrhotic Liver Diseases 597
A. M. GRESSNER and W. TITTOR

Acute Phase Proteins (APP) in Patients with Hepatic Alveolar Enchinococcosis: A Clinical Situation of Dissociation Between Modifications of C-Reative Protein and Other APP 601
D. VUITTON, S. BRESSON, J. M. JOBARD, V. P. TRAN, R. GIBEY and J. P. MIGUET

Defective Acute Phase Responses in Systemic Sclerosis: Disease Mechanisms and Consequences 605
J. T. WHICHER, C. I. WESTACOTT and P. A. DIEPPE

The Acute Phase Response in Acute Graft-Versus-Host Disease 611
PAMELA G. RICHES, S. A. WALKER and J. R. HOBBS

Acute-Phase Reactants and Activity of Crohn's Disease 617
I. BIEMOND, H. W. VERSPAGET and IRENE T. WETERMAN

Rapid Monitoring of CRP in Patients Under Various Clinically Defined Conditions 621
J. E. SCHERBERICH, U. PARLESAK and D. MIX

Acute Phase Reaction in Malignant Mammary Tumors. Detection of Cathepsin *D and Oxidative Activity in Serum* 625
P. LISO-IRURZUN, B. URIARTE, J. A. AMIGUET, I. MONREAL, *C. RODRIGUEZ, J. M. URIARTE and J. PRIETO*

Acute Phase Reactant Proteins in Prostate Cancer 629
E. H. COOPER, J. W. HETHERINGTON and J. K. SIDDALL

C-Reactive Protein, β_2-Microglobulin and Cytosolic Aminopeptidase in Viral Infections and Lymphoproliferative Disorders 633
TAKASHI KANNO, HIROAKI KOHNO and SINJI KANDA

Thrombolytic Therapy Reduces the Acute Phase Response After Acute Myocardial Infaction 637
M. EL ALLAF, J. P. CHAPELLE and C. HEUSGHEM

Plasma Levels of Granulocytic Elastase-α_1-Proteinase Inhibitor Complex, Lactoferrin and α_2-Macroglobulin-Protease Complex in Chronic *Inflammatory Disease* 641
C. E. SPENCE, M. O. ABDEL RAHMAN, D. NKANSA-DWAMENA, P. MADDISON, P. A. DIEPPE, R. WILLIAMSON and J. T. WHICHER

Relationship Between Acute Phase Reactants, Short Half Life Proteins and Serum Amino Acids in Malnourished Critically Ill Patients 645
J. M. BOLES, J. C. BIGOT, B. GARO, M. GARRE and P. Y. YOUINOU

Physiological Inhibition of Creatine Kinase, Phospholipase A2, Prostaglandin E2 and Leukotriene C4 Mediated Inflammatory Reactions Caused by Immobilization of Joints 649
TH. TALLBERG, K. MAHLBERG, J.-E. MICHELSSON and T. KALIMA

Sequential Changes in Plasma Proteins in Intensive Care Patients 653
J. M. BOLES, H. de CHATEAU-THIERRY, B. GARO, J. C. BIGOT, P. YOUINOU and M. GARRE

IgE Determination in Cerebrospinal Fluid (CSF) and Serum of Patients with Neurocysticercosis by a Modified Enzyme Immunoassay 657
A. SPINA-FRANÇA, T. O. KLEINE, J. A. LIVRAMENTO and L. R. MACHADO

Different Behaviour of Prealbumin and Albumin in Blood Serum and Cerebrospinal Fluid (CSF) of Patients with Various Neurological Diseases 661
T. O. KLEINE

Different Behaviour of α-1-Acid Glycoprotein and Albumin in Blood Serum and Cerebrospinal Fluid (CSF) of Patients with Several Neurological Diseases 665
T. O. KLEINE

B.5. *Methodologies*

Detection of Specific Plasma Protein Expression in the Acute Phase Response Using SISLOPAR (Simultaneous *In Situ* Localization of Protein and mRNA) 669
JEAN B. LUM, FUNMAI YANG and BARBARA H. BOWMAN

Quantitation of Factor VIII-Related Antigen (Von Willerbrand Factor Antigen) *in Prostate Cancer by an Enzyme-Linked Immunosorbent Assay* 673
J. M. BARTKUS and R. J. ABLIN

A Macromolecular Fluorescence Polarization Immunoassay (FPIA) for Quantitating Human C-Reactive Protein in Serum 677
E. CHIAPPETTA, L. BENNETT and M. SHAFFAR

Immunochemical Analysis of Patients on Drug Perfusion Pumps Using FUDR as a Treatment for Colon Cancer 681
A. C. HOLLINSHEAD and T. M. PHILLIPS

Effect of Immunomodulating Drugs on E-Rosette Formation by Trypsinized Human T-Cells: Kinetic Assay and Quantitative Method of Evaluation 685
G. BONNEFOY-CLAUDET and J. PANOUSE-PERRIN

SECTION C. ADVANCES IN IEF

C.1. Basic Technologies using Immobilines

Two-Dimensional Separation of Membrane Proteins by IPG-DALT 691
E. GIANAZZA, P. CACCIA, L. QUAGLIA and P. G. RIGHETTI

Two-Dimensional Polyacrylamide Gel Electrophoresis Using Immobilized pH Gradients in the First Dimension 695
M. J. DUNN and K. PATEL

Immobilized and Non-Immobilized pH Gradients for One and Two-Dimensional Separations. Comparison and Applications 701
A. GÖRG, W. POSTEL, S. GÜNTHER and J. WESER

pH Determinations in Mixed 'Immobiline-Carrier Ampholyte' Gels for Isoelectric Focusing 707
ERMANNA ROVIDA, CECILIA GELFI, ANTONIO MORELLI and PIER GIORGIO RIGHETTI

Protein Recovery from Immobiline Matrices 711
CECILIA GELFI and PIER GIORGIO RIGHETTI

Electroblotting from Immobiline Isoelectric Focusing Gels for Direct Protein Sequence Determination 715
R. AEBERSOLD, D. B. TEPLOW, L. E. HOOD and S. B. H. KENT

Purification of ENA Antigens by IEF in Immobilized pH Gradients (IPG). Preliminary Report 719
S. TURCHINI, F. BAMBI, P. BOCCACCINI, F. VANNUCCI, I. BOCCABIANCA and A. PASSALEVA

Effect of Adding a Reducing Agent to Gels Containing Immobilized pH Gradients 723
U. ROSSMAN, R. HACKLER, P. SPONEMANN and K. ALTLAND

C.2. Basic Technologies using IEF and EF

Rapid Separation of Proteins by Isoelectric Focusing in the High-Performance Electrophoresis Apparatus 727
S. HJERTÉN and J.-L. LIAO

The Separation and Visualisation of Proteins with a New, Fast Electrophoresis System 731
E. GRUND, P. HAGERLID, I. OLSSON and J. SAVIN

Fast Electrophoresis as an Aid in Development and Evaluation of High Performance Protein Chromatography 735
U.-B. AXIÖ-FREDRIKSSON, R. BHIKHABHAI, J. E. BREWER, L. G. FAGERSTAM, J-P. LI, H. LINDBLOM and P. STEFFNER

New Internal pI Standards for Isoelectric Focusing Performed Under Denaturing Conditions 741
JORGE LIZANA and KARL-ERIK JOHANSSON

Studies of Ampholyte–Protein Interactions 745
L. SCOTT RODKEY and A. HIRATA

Requirements of the Mobile and Stationary Phases During Development of Chromatographic Focusing Techniques 749
T. W. HUTCHENS

Detection of Specific Antigens Following Analytical Isoelectric Focusing by Immunoblotting into Nitrocellulose Membranes 753
L. MIRIBEL, J. R. DAY and P. ARNAUD

Electrophoretic Titration Curves of Concanavalin-A in Hydroorganic Environments 757
G. CANDIANO, G. M. GHIGGERI, G. DELFINO, C. QUEIROLO, P. BARBORO and G. RIALDI

Titration Curves of Blood Proteins Achieved by Isoelectric Focusing in *Continuous Urea Gradients* 761
R. HACKLER, U. ROSSMANN, A. BANZHOFF, M. WAGNER, C. STROH and K. ALTLAND

A Nonpolymeric Focusing Buffer of Defined Chemical Composition Developed for Chromatofocusing 765
T. W. HUTCHENS, C. M. LI and P. K. BESCH

Automated Silver-Staining of IEF, Native and SDS-Page Gels in Seventy-Five Minutes 769
R. BHIKHABHAI, E. OLAISSON, A. MANRIQUE and P. TUNON

Rapid, Sensitive Silver Staining of Proteins in Body Fluids after Electrophoresis 773
R. BHIKHABHAI, H. LINDBLOM, P. STEFFNER, I. OLSSON and L. FÄGERSTAM

C.3. Separation of Enzymes

Isoelectric Focusing of Membrane-Bound Enzymes in Mixed Immobiline-Ampholine Gels 777
PRANAV SINHA, ADRIANA BIANCHI-BOSISIO and PIER GIORGIO RIGHETTI

Comparison of the Choroid Plexus and Ciliary Body Enzymes by Isoelectric Focusing on Immobilized pH Gradients 781
PRANAV SINHA, ADRIANA BIANCHI-BOSISIO, PIER GIORGIO RIGHETTI and THOMAS PAHLITZSCH

Preparative and Analytical Electrofocusing of Class III Human Liver Alcohol Dehydrogenases in Immobilized pH Gradients 785
K. H. VALKONEN and D. GOLDMAN

Determination of Creatine Kinase Subisoenzymes by Isoelectric Focusing: New Perspectives for Clinical Enzymology 791
J. P. CHAPELLE

Heterogeneity of the Aldehyde Dehydrogenase Activity in Rat Tissues Determined by Isoelectric Focusing Normal Enzymes and Enzymes Induced by Xenobiotics 795
M. KOIVUSALO and T. KOIVULA

Isoelectric Focusing of Human Galactosyltransferase 799
E. G. BERGER

Use of IPG to Investigate the Microheterogeneity of Amine Oxidase from *Lens culinaris* and Human Seminal Transferrin 803
A. ORATORE, G. D'ANDREA, A. M. D'ALESSANDRO

The use of IPG to Purify a Fibrinolytic Snake Venom Enzyme 807
F. S. MARKLAND and A. L. GUAN

Phenotype Determination of Human Erythrocyte Acid Phosphatase in 30 Minutes 811
H. ENGARAS and C. JÄGERSTEN

C.4. Separation of Plasma Proteins

C.4.1. Albumin

Screening of CNBr Peptides from Genetic Variants of Human Serum Albumin by Isoelectric Focusing 815
M. GALLIANO, L. MINCHIOTTI, P. IADAROLA and F. PORTA

Investigation of Microheterogeneity of Urinary Albumin in Juvenile Diabetics 819
R. WARTHA, M. RIES, H. SCHMIDT, K. KRUSE and D. GEKLE

IEF in Low Denaturing Media of Urinary Albumin from Nephrotic Children 823
G. M. GHIGGERI, G. CANDIANO, G. DELFINO, F. GINEVRI, R. GUSMANO, F. PERFUMO and C. QUEIROLO

C.4.2. Immunoglobulin

IgG Paraprotein Microheterogeneity After Isoelectric Focusing: Immobilized pH Gradients vs. Carrier Ampholytes 827
H. I. SCHIPPER, J. WESER, G. BERTRAM and A. GÖRG

pI and Sialylation of Light Chains in Myelomatosis 831
R. TURNER, E. A. JOHNS, E. H. COOPER and I. C. M. MACLENNAN

Improved Detection of Free Light Chains in Unconcentrated CSF by Agarose IEF and Avidin-Biotin-Peroxidase Staining 835
P. GALLO, R. MENNA, F. BRACCO, B. TAVOLATO and L. BATTISTIN

Detection of Oligoclonal IgG Bands in Unconcentrated CSF by Isoelectric Focusing in Agarose Gel and Silver Staining 839
PANKAJ D. MEHTA, BRUCE A. PATRICK and JEFFREY BLACK

Anion Exchange Chromatography and Isoelectric Focusing of Serum Immunoglobulins 843
P. GALLO, A. SIDÉN and B. TAVOLATO

IgG BMG and Neurological Disorders: A Study by Chromatofocusing and Agarose IEF 847
P. GALLO, M. PICCINNO, A. PACCAGNELLA, F. BRACCO and B. TAVOLATO

Isoelectric Focusing Combined with Chromatofocusing and ELISA for Investigations of Anti-MBP Antibodies 851
A. GARCIA-MERINO, P. GALLO, A. SIDÉN and B. TAVOLATO

The CSF Humoral Immune Response in Multiple Sclerosis Studied by Two-Dimensional Gel Electrophoresis 855
S. BERGENBRANT, P. GALLO, C. GUDMUNDSSON and A. SIDÉN

Separation and Characterization of a Purified Recombinant Human Consensus Interferon using Preparative Immobiline Electrofocusing 859
JANICE M. DAVIS, TIM BARTLEY, CAROL GRAHAM PARKER, POR LAI, PIER GIORGIO RIGHETTI and LARRY GOLDSTEIN

C.4.3. Various proteins

Hybrid Isoelectric Focusing for Classification of Alpha-1-Antitrypsin Variants 863
S. WEIDINGER and H. CLEVE

Multidimensional Chromatography of Alpha Plasma Proteins 867
T. TURNER, A. COX and E. H. COOPER

Two-Dimensional Electrophoresis of Myofibrillar Proteins with Immobilized pH Gradients 871
J. J. PERNELLE, P. CHAFEY, J. L. LOGONNE, P. G. RIGHETTI, A. B. BOSISIO and J. P. WAHRMANN

Identification of Different Patterns of Antithrombin III Congenital Defective Variants by Crossed Immunoelectrofocusing 877
G. LEONE, V. DE STEFANO, F. ACCORRA, A. DI DONFRANCESCO and R. FERRELLI

Analytical Studies of Human Pituitary and Placental Growth Hormone (GH) Variants 881
J. SMAL, F. FRANKENNE, F. GOMEZ, J. CLOSSET and G. HENNEN

Analysis of Hemoglobins in Immobilized pH Gradients 885
GIANFRANCO COSSU, MARIO MANCA, ADRIANA BIANCHI BOSISIO, ELISABETTA GIANAZZA and PIER GIORGIO RIGHETTI

Application of IEF to Follow the Purification of Angiotensin Converting Enzyme (ACE) 889
B. BAUDIN, L. DROUET, Y. J. LEGRAND and F. C. BAUMANN

Characterization of Cell Adhesion-Promoting Serum Proteins by Isoelectric Focusing 895
M. VUENTO, M. KORKOLAINEN, P. KUUSELA, I. ERONEN and E. HÖLTTÄ

Interaction of Gc (Vitamin D-Binding Protein) with G-actin or Proteolytic Fragments of Actin Causes Similar Alteration in IEF Profile 899
PASCAL J. GOLDSCHMIDT-CLERMONT, PHILIPPE ARNAUD and ROBERT M. GALBRAITH

Identification of Caprine Casein Variants by Electrophoretic Techniques 903
A. DI LUCCIA, R. MAURIELLO and F. ADDEO

C.5. Separation of Animal Proteins

Preparative Separation of Pig Polymorphic Beta-Lactoglobulins by IPG and Non-IPG 907
A. CONTI, L. NAPOLITANO, J. GODOVAC ZIMMERMANN, J. LIBERATORI and G. BRAUNITZER

The Use of Isoelectric Focusing in Immobiline Flatbeds for the Recovery of Follicle Regulatory Protein from Porcine Follicular Fluid 911
E. A. HOLMBERG, J. D. CAMPEAU, D. L. DEVEREAUX, T. ONO and G. S. DIZEREGA

Developmental Changes in the Protein Composition of the Embryonic and Extraembryonic Fluids of the Domestic Fowl 917
J. ZHANG, G. HUETHER and V. NEUHOFF

The Combination of Isoelectric Focusing and Crossed Immunoelectrophoresis for the Analysis of Membrane Proteins of Spiroplasmas with Special Reference to *Spiralin* 921
L. QUILLIEN, A. ZAARIA, C. FONTENELLE and H. WRÓBLEWSKI
